

ABBYY Flexicapture Stand Alone System Requirements

Standalone Installation

System Requirements

- PC with Intel® Pentium®/Celeron®/Core™2 Duo/Quad/Xeon®/Core™ i5/Core™ i7, AMD K6/Turion™/Athlon™/Duron™/Sempron™ with a minimum clock speed of 2 GHz
- Operating system: Windows XP SP3, Windows Vista SP2, Windows 7 SP1, Windows 8/8.1, Windows Server 2003 SP2, Windows Server 2008 SP2 + Desktop Experience, Windows Server 2008 R2 SP1 + Desktop Experience, Windows Server 2012 + Desktop Experience, Windows Server 2012 R2 + Desktop Experience (for localized interfaces, corresponding language support is required)
- Memory: 512 MB for each CPU core, but no less than 1 GB
- Hard disk space: 1.5 GB (including 1 GB for installation)
- Scanner supporting TWAIN, WIA or ISIS
- Video card and display with a resolution of 1024×768
- Microsoft .NET Framework 3.5 SP1

Supported virtual machines

The following virtual machines are supported:

- VMware Server 2.0 (this platform is no longer supported by the manufacturer)
- VMware Workstation 6.5 - 9.0
- VMware ESXi 4.1.0 (server component of VMware vSphere)
- Hyper-V 6.0, 6.1 or 6.2 (Hyper-V version corresponds to the version of the Operating system. Under Windows Server 2008, Hyper-V 6.0 is used)

Note: Hyper-V virtual machines do not work with USB devices. VMware ESXi virtual machines work with Wibu drivers only, iKey drivers are not supported.
