

FEATURES AT A GLANCE

The MuWave Quillix Administration Console from UFC, Inc. is an add-on application to the Quillix document capture system which allows administrators to manage the system from a web-based application. This application was designed to provide a user-friendly way for administrators to perform their job functions, and provides a web-based interface for managing the audit log, cases, and system services.

- Works as an add-on to Quillix
- Provides for very flexible management
- Provides administrator tools to effectively monitor system activity

WHY IS THERE A NEED?

Our customers found that a web-based, smart-phone accessible tool was needed to manage their Quillix environments without having to login to their document capture servers. The MuWave Quillix Administration Console provides this capability and provides many diagnostic and troubleshooting tools as well!

MuWave Quillix Administration Console

OVERVIEW:

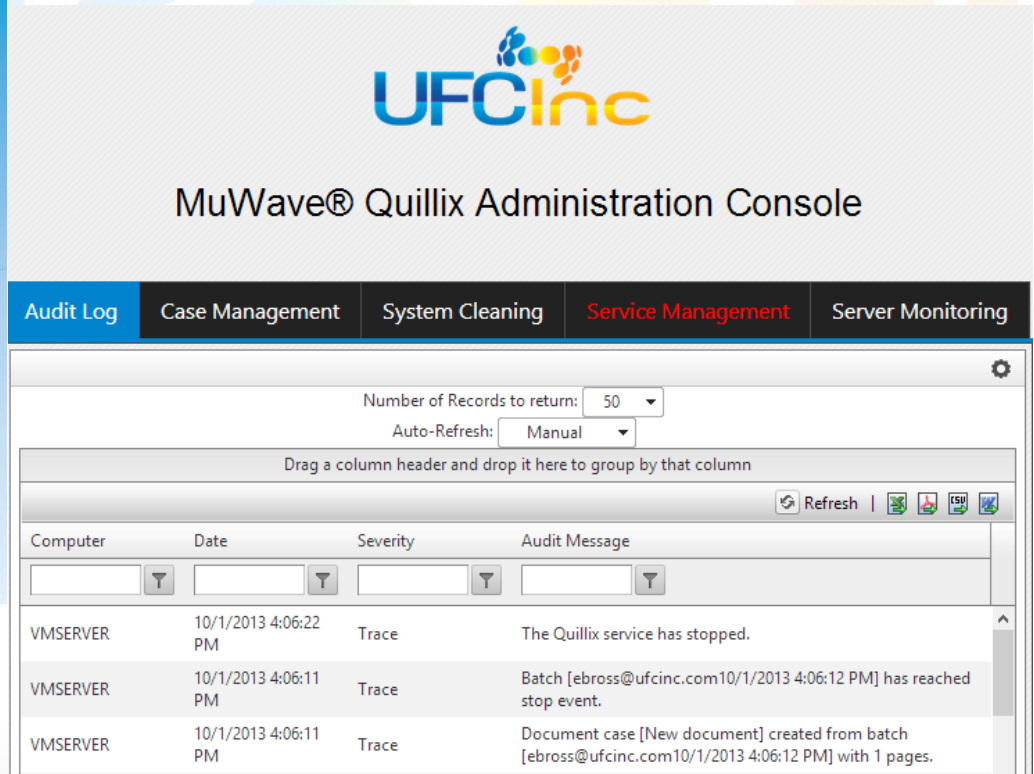

The MuWave Quillix Administration Console is a web application (ASP.NET) designed predominantly in Microsoft .NET that provides a user-friendly methodology for administrators to perform their job functions in the Quillix document capture environment. The audit log preview, case management, service management, system cleaning, and server monitoring features provide administrators with the tools needed to effectively manage their systems. The application can also be accessible by smartphones for organizations who authorize it to be used in that manner.

ADMINISTRATORS OF THE MUWAVE QUILLIX ADMINISTRATION CONSOLE CAN:

- Monitor, search, filter, and group the Audit Log messages
- Set a custom refresh rate for the Audit Log preview
- Search, download a copy of, or delete cases
- Start and stop the Quillix Server service
- Perform system cleaning functions such as delete the working and process data directories, delete audit log entries, and delete cases; this is traditionally used on a development server
- Preview system performance counters produced by the Performance Monitor on the server

CLEAN, LOGICAL LAYOUT:

The web page is laid out in an easy to use and logical manner. Notice that when the Quillix server is stopped that tab is colored red.
