

Solutions for SharePoint Server

HAVE YOU INVESTED IN SHAREPOINT BUT ARE YET TO IMPLEMENT AN ENTERPRISE SOLUTION?

PART OF A COMPLETE SOLUTION

The true power of Quillix is released when it is combined with the entire suite of MuWave QSX modules. MuWave E-Mail Gateway, MuWave Forms Pro and MuWave Route can be combined into a powerful capture workflow solution, allowing you to capture documents from the web, convert them to hidden-text PDF's, and save them into SharePoint Server or any document repository.

REQUIREMENTS

- Microsoft SharePoint Server 2010 or 2013

ABOUT UFC INC.

UFC was founded in 1990 and has been serving the information technology needs of companies through the integration of industry leading products from Quillix, ABBYY, and Microsoft. Our Mission is to provide world-class document management software and services to ensure success for our customers. Our positive employee environment encourages imagination and nurturing of new ideas.

MORE INFORMATION AVAILABLE ONLINE AT WWW.UFCINC.COM

There is little doubt that the ECM market is being redefined by Microsoft SharePoint®. More and more organizations are starting to jump on the SharePoint bandwagon. It has launched data collaboration and records management into the limelight, highlighted the importance of image and data capture tools, and turned ECM into an infrastructure play.

SharePoint alone can't meet all of the ECM needs of an enterprise. Microsoft's strategy has always been to build platforms which satisfy the majority of common requirements but to leave open a pool of other requirements that are addressed by third-party products. In the case of SharePoint, it needs third-party applications to fill in a number of voids by supplying key ECM capabilities (such as data capture and transactional content management).

One requirement that SharePoint does not address is in the area of capturing paper documents. Paper documents need an efficient way to get into the SharePoint repository. This includes accurately building index data and correctly storing the documents within the associated SharePoint library. None of these tasks are handled out of the box by SharePoint.

This is where UFC can help. We provide several easy to implement solutions for capturing documents to Microsoft SharePoint. These include 1. Our Quillix Web Solution, 2. ABBYY Flexicapture, and 3. ABBYY Recognition Server. The bottom line question that we can help you answer is, "How can I make documents searchable in SharePoint?"

Quillix Web Capture:

Quillix provides a full featured, web-based capture platform for SharePoint. This enterprise level solution is well suited for SharePoint with it's native Windows Server architecture, graphical workflow design studio and other features which make it the chosen solution for firms of all sizes. The Quillix suite includes advanced OCR functionality to make your documents searchable in SharePoint. Quillix is available with extension modules by UFC which add advanced features including forms processing using the ABBYY FineReader and Flexicapture engines. [Find out why](#) Halliburton and KBR chose Quillix and UFC.

ABBYY Recognition Server:

Recognition Server provides an out of the box, scalable capture and OCR solution which makes documents instantly searchable in SharePoint. The production OCR capture application has been chosen for its rapid implementation and ROI. [Find out why](#) Wayne State University and InTouch Ministries recently chose UFC and Recognition Server.

ABBYY Flexicapture:

Flexicapture provides advanced document capture and forms processing including extraction of printed text, handwriting and check marks. It comes available in a stand-alone version for lower volumes or the standard web-server based distributed capture version. Flexicapture can accomplish things like extraction of line items from purchase orders, handwriting from employee forms, capture of documents through the Internet on a web browser, and much more. [Find out why](#) thousands of companies choose Flexicapture.
